## PROFESSIONAL SUMMARY

Ambitious Computer Science Engineering student and Frontend Developer (UI/UX) with hands-on experience designing and developing responsive, interactive, and user-centric web applications. Skilled in React.js, JavaScript, and Firebase, with a strong focus on frontend architecture and full-stack integration. Actively engaged in AI application development, prompt engineering, and LLM integrations to create intelligent digital products.

## EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                |

| <b>Frontend Developer (UI/UX) Intern - Yudi AI Labs</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | <b>Present</b> |
| <ul style="list-style-type: none"><li>Contribute to the design and development of modern, responsive, and user-centric web applications.</li><li>Develop interactive user interfaces utilizing React.js, HTML5, CSS3, and JavaScript.</li><li>Design clean, modern, and user-friendly UI/UX experiences in alignment with usability best practices.</li><li>Build reusable, modular, and scalable frontend components to ensure code maintainability.</li><li>Optimize web applications for performance, accessibility (A11y), and responsiveness across desktop and mobile devices.</li><li>Collaborate closely with designers and developers using Figma to deliver seamless user interactions.</li></ul> |                |

## FEATURED PROJECTS

|                                                                                                                                                                        |                           |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------|
| <b>BeatFlow – Music Streaming Platform</b>   <i>React.js, JavaScript, Firebase, CSS3, HTML5</i>                                                                        | <a href="#">Live Link</a> |
| A modern music streaming web application featuring user authentication, playlist management, Spotify-inspired premium UI, and dynamic media playback control engines.  |                           |
| <b>Qubic Council – AI Collaboration Platform</b>   <i>React.js, JavaScript, Tailwind CSS, Firebase, Vercel</i>                                                         | <a href="#">Live Link</a> |
| A modern web platform designed to deliver a responsive, multi-LLM AI collaboration workspace with smooth navigation, optimized performance, and scalable architecture. |                           |
| <b>Agri AI – Smart Agriculture Platform</b>   <i>React.js, JavaScript, AI Integration, Firebase, Vercel</i>                                                            | <a href="#">Live Link</a> |
| An AI-powered smart agriculture platform helping farmers improve productivity through crop recommendations, soil analysis, and yield prediction visualizations.        |                           |

## TECHNICAL SKILLS

|                                 |                                                                                       |
|---------------------------------|---------------------------------------------------------------------------------------|
| <b>Frontend:</b>                | HTML5, CSS3, JavaScript, React.js, Responsive Web Design, UI/UX Design                |
| <b>Backend &amp; Databases:</b> | Node.js, REST APIs, Firebase                                                          |
| <b>Programming Languages:</b>   | Python, JavaScript                                                                    |
| <b>Tools &amp; Platforms:</b>   | Git, GitHub, Firebase, Vercel, VS Code, Figma                                         |
| <b>AI &amp; Development:</b>    | Prompt Engineering, AI Application Development, Research & Development, LLMs, AI APIs |

## CERTIFICATIONS, ACHIEVEMENTS & LANGUAGES

#### **CERTIFICATIONS**

- AWS Cloud practitioner (Prep)
- Google Cloud Practitioner (Prep)
- Meta Front-End Developer Course

#### **ACHIEVEMENTS**

- Hackathon podium finishes
- Active open-source contributions
- Built 5+ web & AI projects

#### **LANGUAGES**

- English (Fluent)
- Telugu (Native)
